

Firms Are Green

The Top 200 Environmental Firms enjoyed a banner year for revenue in just about all market sectors and continents. Some familiar names left the list this year due to acquisition and other strategic business steps, but new ones joined. Total revenue soared to \$42.2 billion, even without budding nuclear-waste-cleanup giant EnergySolutions, now in the middle of an initial public offering. Two firms joined the Top 200's billion-dollar club and the list's entry level rose by nearly \$3 million. But will the housing market's falloff begin to slow down the green machine?

With Growth

How To Use The Tables

► **RANKINGS:** Companies are ranked below based on gross revenue they reported in 2006 for providing environmental services and products to domestic and international markets. The proportion of a firm's gross environmental services revenue to its total gross revenue is provided as a percentage. Revenue figures are in \$ millions. Percentages are rounded and may not add up to 100%.

► **FIGURES:** Numbers include revenue from all environmental subsidiaries unless otherwise noted. The non-U.S. category represents revenue from environmental work performed outside of the U.S. Companies with subsidiaries included are designated by this symbol (†). Subsidiary listings can be found on line at www.enr.com. Companies not ranked among the Top 200 Environmental Firms in 2006 are designated by this symbol (**). Where necessary, individual numbered footnotes that clarify company information are at the bottom of each page. An alphabetical listing of the 2007 Top 200 Environmental Firms is found on p. 59.

► **TYPE OF FIRM:** Labels are based on the largest % of environmental revenue in seven categories: **DES**=Engineering/Design; **CSL**=Consulting/studies; **CON**=Construction/remediation; **CON MGT/PM**=Construction management/program management; **EQP**=Equipment; **R&D**=Technology/research & development; **OPS**=Contract operations; **OTH**=Services not included in above categories. Two or more designations appear if the largest % of revenue is evenly split between two or more categories, or if categories are within 5% of each other.

Work in these **MARKETS** is displayed as a percentage of gross environmental revenue:

- **HAZARDOUS/SOLID WASTE**=Chemical and industrial waste cleanup and/or material management, lead or asbestos abatement, municipal and nonhazardous waste landfills and recycling facilities.
- **NUCLEAR WASTE**=Nuclear or radioactive materials and waste handling, storage and/or disposal.
- **AIR**=Facility air-pollutant-emissions study, management and control.
- **WATER QUALITY**=Industrial and/or municipal water-system supply and treatment.
- **WASTEWATER TREATMENT**=Industrial and/or municipal wastewater-treatment systems.
- **ENVIRONMENTAL MANAGEMENT/COMPLIANCE**=Site assessments, audits, studies, due diligence; activities related to general environmental compliance; environmental information technology.
- **ENVIRONMENTAL SCIENCES/PLANNING**=EIS/EIRs, natural resources, modeling, wetlands.
- **OTHER**=Environmental markets not included in the above categories.

Work for these types of **CLIENTS** is displayed as a percentage of gross environmental revenue:

- **PRIVATE**=Private corporations; utilities, other.
- **FEDERAL**=Federal U.S. agencies and/or foreign governments.
- **STATE/LOCAL**=State and municipal entities.
